

THE MAVERICK Drilling Pump

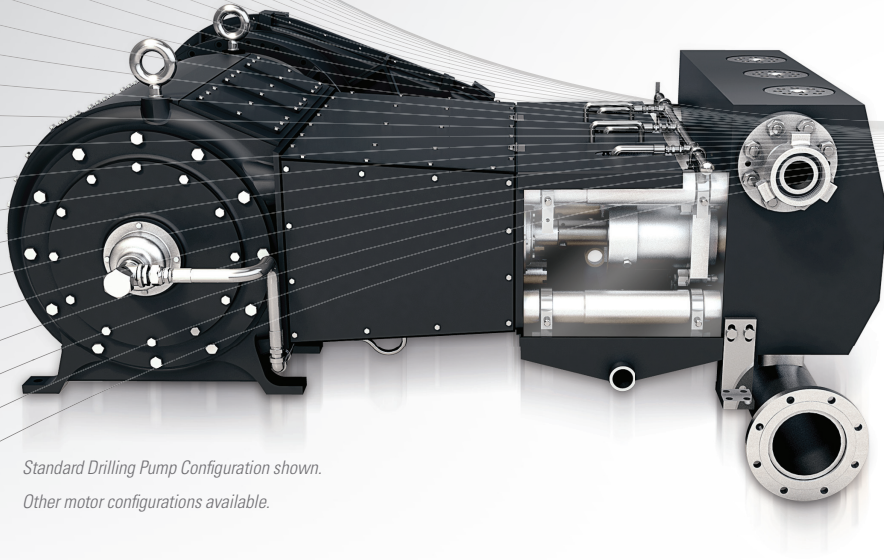

SPECIFICATIONS

Maximum Input	1,500 BHP (1,118 kw)
Maximum RPM	110 RPM
No. of Pistons	3
Stroke Length	11" (279 mm)
Piston Load	147,275 (655,112 N)
Pump Weight	19,500 lbs. (8,845 kg)
Gear Ratio	7.842:1
Overall Length	100" (2,559 mm)
Overall Width	101" (2,575 mm)
Overall Height	43" (1,107 mm)

THE MAVERICK Drilling Pump

Standard Drilling Pump Configuration shown.

Other motor configurations available.

OPTIONAL FEATURES

- Various piston, liner styles and sizes
- Splined flange for gear reducer
- Center gauge connection
- Hydraulic torque wrench for fluid end removal
- Centrifugal suction charging pump
- Suction stabilizer and/or discharge dampener
- External electric-powered lube pump

STANDARD FEATURES

- Small footprint design that delivers performance comparable to much larger drilling pumps
- 101" width dimension allows for permit-free truck mounted transport
- Lightweight, can be helicopter airlifted without breaking down to constituent components
- Modular power end design featuring high power density planetary gearbox with offset
- Forged, heat-treated alloy steel crankshaft
- Cross-drilled crankshaft and connecting rod for pressurized oil flow to critical components
- Coated crosshead surfaces for wear resistance
- Hardened surface on connecting rod thrust knuckle for severe duty applications
- Forged SAE 4330 fluid end for extended field service
- Through stud fluid end design for maintenance and removal ease
- Fluid end employs Falcon twist-in spring retainer technology
- P-Quip "KwikRod" quick change piston rod system
